PROFESSIONAL SUMMARY

Software developer and Software Engineering student with experience in mobile apps, backend development, and AI integration. I design interfaces and prototypes in Figma with a focus on accessibility. I built Octuma, an open-source Python and PyTorch library that quantizes language models and exports them to GGUF for llama.cpp.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, PHP, SQL

AI and ML: PyTorch, CUDA, Hugging Face Transformers, INT4/INT8 quantization (GPTQ, AWQ), GGUF, llama.cpp, LLM integration via API and local inference

Mobile development: Flutter (Dart), Android (Kotlin, Java)

Backend and tools: Node.js, Docker, Git

Interface design: Figma, UI design, accessibility, components, and interactive prototyping

EXPERIENCE

Full Stack Developer (Social Service) | Universidad de Colima

Colima, Mexico | Sep 2025 - Mar 2026

- Developed the PHP backend and database for the system that manages the organizational structure of Universidad de Colima.
- Packaged the departments, positions, users, and org chart modules in Docker containers for the IT department's pre-production environment.

Full Stack Developer (Freelance) | Farma Oncología

Colima, Mexico | Aug 2024 - Feb 2025

- Developed the Flutter interface and backend for Onco Scan, a breast cancer prevention app that I published on Google Play.
- Integrated a machine learning model that estimates each user's risk based on her answers to a questionnaire.
- Deployed the JavaScript backend and SQL database, and configured the domain and web hosting.

FEATURED PROJECTS

Octuma | Language Model Quantization Library | GitHub

- Built an open-source Python and PyTorch library with GPTQ/AWQ quantization and GGUF export for llama.cpp.
- Reduced the Qwen2.5-3B GGUF file from 6.18 to 2.40 GB with a 2.43% perplexity increase on WikiText-2, evaluated in llama.cpp.

EDUCATION

B.S. in Software Engineering | Universidad de Colima

Colima, Mexico | Aug 2023 - Present | Expected graduation: Aug 2027

COURSES AND CERTIFICATIONS

Python Essentials 2 | Cisco and OpenEDG Python Institute | Sep 2026

5-Day AI Agents: Intensive Vibe Coding Course | Kaggle and Google | Jul 2026

Introduction to Data Science | Cisco | Mar 2026

Google Data Analytics Professional Certificate | Coursera

In progress (course 1 of 9)

LANGUAGES

Spanish: native | English: A2 (basic)
